THE STRUCTURE OF A THEMATIC NETWORK

A conclusion which expresses the meaning of the data as a whole within the border of the research.

A cluster formed based on basic themes that deliver a similar idea.

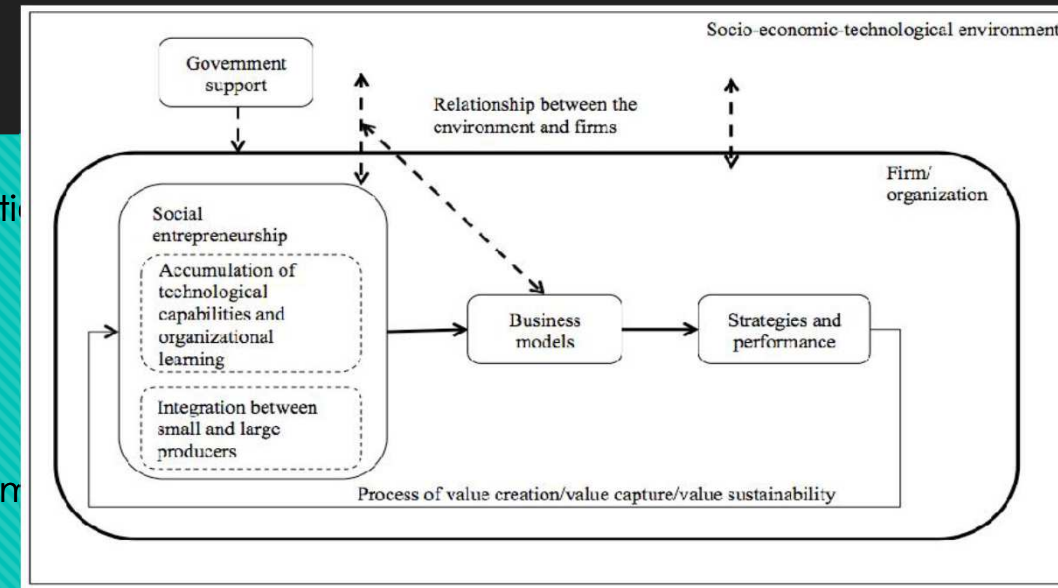

A statement or belief, which is affiliated toward a central notion. At this level, on their own, the data has no meaning.

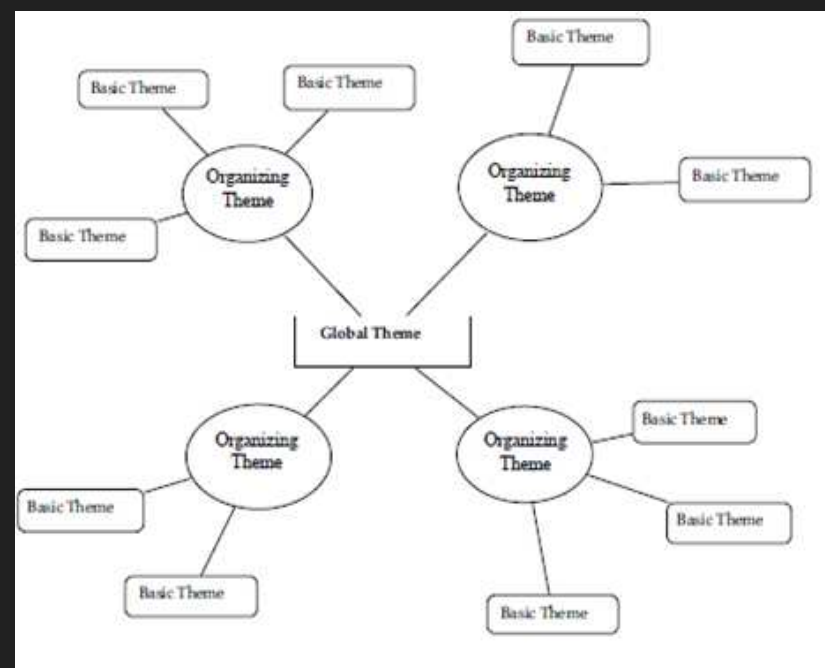

Global theme : the analysis of several BIM's in Agriculture

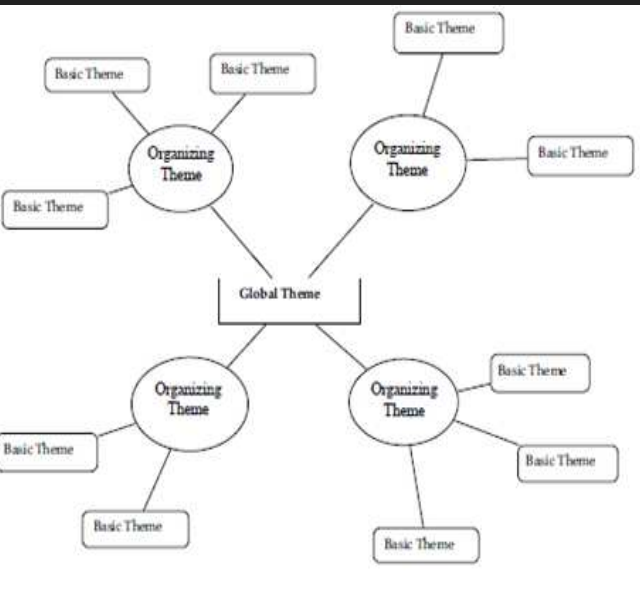

Organizing themes : Social entrepreneurship
Accumulation of technological capabilities and organizational learning
Integration between small and large producers
Government support
Socio-economic technological environment
Strategies and performances

Basic themes : BIM 1, BIM 2.....

The structure of an AHP model

GLOBAL THEME

THE ANALYSIS OF SEVERAL BIM IN AGRICULTURE

ORGANIZING THEME

- Government support
- Integration between small and large producers
- Social entrepreneurship
- Socio-economic technological environment
- Strategies and performances
- Technological capabilities and organizational learning

Alternatives

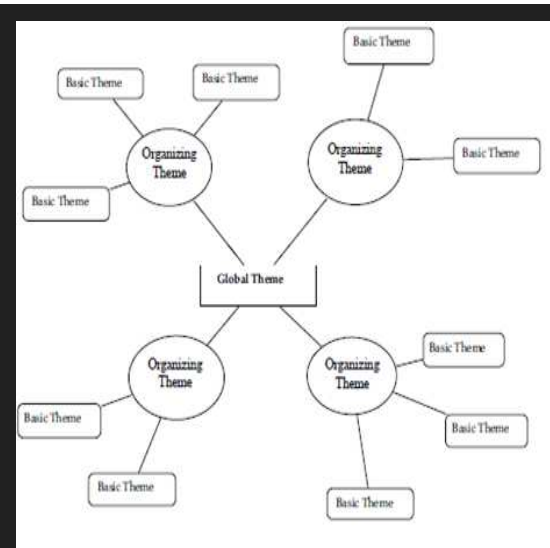

- BIM 1

Rate of Change with respect to an increase of the Government Support (GS)

	GS as in present	GS up with 50 %	Rate of change	
BIM 3	0.278	0.395	$\frac{0.395 - 0.278}{0.278}$	42 %
BIM 2	0.237	0.223	$\frac{0.223 - 0.237}{0.237}$	-6 %
BIM 1	0.485	0.382	$\frac{0.382 - 0.485}{0.485}$	-21 %

Analytic Network Processes as a tool in the development of the Thematic Networks for Business Innovative Models in Agriculture: several reasons for an integrated approach

The extended sense associated with the sintagm : 'Thematic Network '

EU-Cordis :

- since 2002-until 2014 there were 6222 EU financed projects for developing Thematic Networks (TN) in different fields
- 628 EU financed projects -TN for business innovative models
- 879 EU financed projects- TN in agriculture

RECENT TRENDS: for TN for business models in agriculture - 190 projects –in between 2014-2016

Enhancing the human and social capital

Thematic networks

Horizontal

AGRI-SPIN - Space for Agricultural Innovation: website - CORDIS (2014)

HNV-link - High Nature Value Farming: Learning, Innovation and Knowledge: CORDIS (2015)

SMART-AKIS - European Agricultural Knowledge and Innovation Systems (AKIS) towards innovation-driven research in Smart Farming Technology: CORDIS (2015)

AGRIFORVALOR - Bringing added value to agriculture and forest sectors by closing the research and innovation divide: website - CORDIS (2015)

Crops

OK-Net-Arable - Organic Knowledge Network Arable: website - CORDIS (2014)

FERTINNOWA - Transfer of INNOvative techniques for sustainable WAter use in FERTigated crops: CORDIS (2015)

WINETWORK - Network for the exchange and transfer of innovative knowledge between European wine-growing regions to increase the productivity and sustainability of the sector: website - CORDIS (2014)

EUFRUIT - EU Fruit Network: CORDIS (2015)

Livestock

HENNOVATION - Practice-led innovation supported by science and market-driven actors in the laying hen and other livestock sectors: website - CORDIS (2014)

EuroDairy - A Europe-wide thematic network supporting a sustainable future for EU dairy farmers: website - CORDIS (2015)

4D4F - Data Driven Dairy Decisions 4 Farmers - CORDIS (2015)

EIP-AGRI , Multi –Actor Approach, Territorial CAP assessment

Call : H2020-RUR-2016-2017

Topic Description

Specific Challenge:

Despite the continued generation of knowledge through scientific projects,

research results are often insufficiently exploited and taken up in agricultural practice, and innovative ideas and methods from practice are not captured and spread.

National and sectoral agricultural knowledge and innovation systems (AKISs) are insufficiently connected to fully meet this challenge.

In view of fostering economically viable and sustainable agriculture and forestry, it is essential to close the research and innovation divide and to act at EU level.

More cooperation is needed between researchers, advisors, farmers/foresters and other actors in the supply chain to stimulate knowledge exchange so as to optimise resource use and smooth the transition to a knowledge-driven agriculture.

Thematic networks are a key element in the implementation of the EIP Agricultural Productivity and Sustainability (EIP-AGRI)

with a view to fostering cross-border knowledge exchange and they may enable links being established with and between the EIP-AGRI Operational Groups supported under rural development programmes.
